

IBU | tec

PROJECT MANAGER – CHEMIST/CHEMICAL ENGINEER

📍 Weimar

📅 Permanent Position

🕒 Full time | 30 Days of vacation

OUR COMPANY

The IBU-tec Group combines know-how and production capacities in two very demanding chemical industry fields: thermal processes at IBU-tec and wet chemistry at our subsidiary, BNT Chemicals. Regarding the service business, we develop customized process solutions. Specialized in-house products form other aspects of the group: from organometallic catalysts and glass coatings to pigments and battery materials. With five locations in Germany, around 240 employees work for global customers – in laboratories, production facilities, development, logistical support and other areas.

THE POSITION

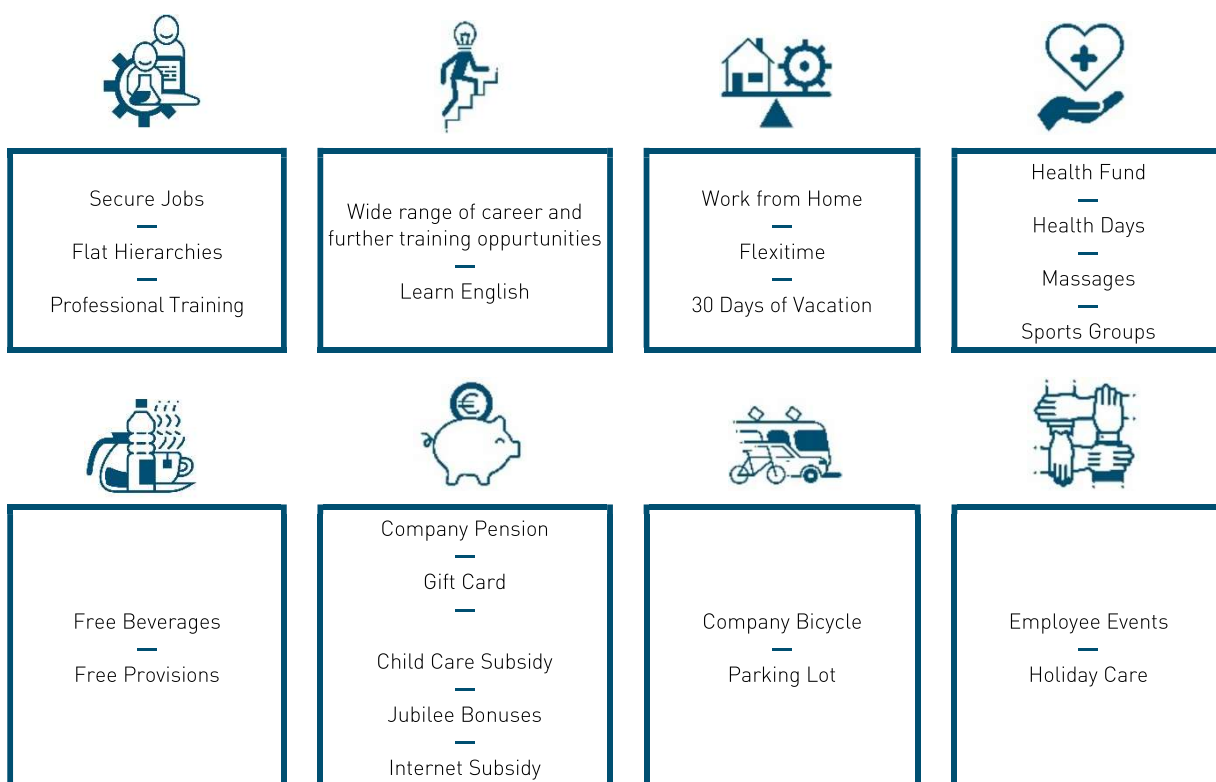

Tasks and responsibilities

- Processing of customer inquiries
- Analysis and evaluation of customer requirements regarding their technical feasibility
- Problem solving development according to customer requirements and clarification of open questions
- Preparation of project descriptions and concepts, simulations, balance sheets
- Elaboration and calculation of offers in cooperation with the technical departments and in coordination with the customer,
- Complete management of projects
- Competent and active support and technical consulting of new and regular customers on site and by phone (at least German & English)
- Internal process development activities
- Execution and evaluation of technical tests
- Modeling and calculation of processes
- Further process development

Requirements

- Master's degree in chemistry (technical chemistry), chemical engineering, graduate engineer or master's degree in process technology or similar
- Confident appearance and pleasure in dealing with people and technology
- Ability to work in a team, independently, goal-oriented and practical
- Service and customer orientation
- Good knowledge of German and English, further foreign language skills would be an advantage
